

Measurement Mash-Up

Today's project is for children in 1st - 5th grade. It is a Measurement Mash Up. There is no video associated with this project, just the worksheet that you send home with each participant along with a pencil, a ruler, and a cardstock protractor.

You could provide an incentive for the children to return their worksheets by offering books or other prizes (even tape measures). I know my grandchildren love measuring stuff with their tape measures.

If you decide to use Project #13, the System will provide the pencils, rulers, and cardstock protractors for all planned participants. We will also send tape measures for the percentage of participants you expect will return the worksheet.
