

Drops on a Penny

Materials: Water

Penny

Eye dropper or Pipette

- Step 1: Wash and rinse a penny in tap water. Dry it completely with a paper towel. Place the penny on a flat surface.
- Step 2: Use an eye dropper or pipette to draw up water.
- Step 3: Carefully drop individual drops of water onto the flat surface of the penny.
- Step 4: Keep track of the water drops as you add them, one at a time, until water runs over the edge of the penny. You'll probably be surprised by the number of drops you get on there!
