

# Program Details

June 6-10 • 10:30-11:30 am

## Monday June 6th

### CRYSTAL CLEAR WITH KYLE

Ages 2 - 5

Following Storytime, Kyle Schumacher, Coordinating Wildlife Biologist for Northern Prairies Land Trust, will teach the kids the importance of keeping our rivers, streams, and oceans clean, and will guide them in their own fun clean up adventure.

### **The Great Shark Rescue Challenge**

Ages 6 & up

For this Breakout Box session, their skills will be put to the test as the kids work in teams while performing a series of mental & physical challenges in order to unlock the evil that could destroy the planet. A short video about sharks will be played at the beginning of the session.

---

## Tuesday June 7th

### **GO FISH!**

Ages 2 - 5

We'll start this day with a colorful fish story. And since the water was cleaned up the previous day, the kids will take part in an enjoyable fishing activity using their color skills while discovering more reasons why clean water is so important in nature.

### **Oceans of Possibility**

Ages 5 & up

The Ocean is one of the last great wonders on the amazing blue marble called Earth. Join educators from Omaha's Henry Doorly Zoo & Aquarium as they explore the majesty and mysteries of the world's oceans and discover some of the threats the oceans face. Using video, artifacts, and animal ambassadors, kids will learn about this amazing habitat, the creatures that make it their home, and some of the people working to save it.

## Wednesday June 8th

### Ocean in MOTION PICTURE day All Ages

Ahoy mates! On this day we drop anchor for a mid-week movie while enjoying Captain D's Shark Bait Popcorn accompanied by Sea Foam Punch. Kid's are encouraged to bring a blanket, floor cushion or mat, beanbag, or any other comfortable seating. Due to the length of the movie, this session may run longer than the hour. Movie TBA.

---

## Thursday June 9th

### SEAFari Adventure Ages 2 - 5

After A short story, all the little sea adventurers will put on their special underwater goggles (which will be provided) and dive into the deep blue sea in search of the designated creatures on their handout cards. For a more fun and realistic experience, kids may want to wear their swim suits for this session.

### Sea Art: Bleeding Tissue Paper Painting Ages 5 & up

Using special bleeding tissue paper along with white crayons and water, kids will use their imaginations to create beautiful watercolor paintings of their favorite underwater or sea-scape scenes. All materials will be furnished.

---

## Friday June 10th

### Ocean Yoga with Marie Ages 2 - 5

Sea life comes to life with Yoga Instructor Marie Paulk who will teach the kids poses that mimic animals living in the ocean. It's a fun way to add physical activity to your kid's day while learning little mini facts about each animal along the way. Kids should wear comfortable clothing on this day.

### WONDERFUL WORLD OF WAVES & WAVE IN A BOTTLE Ages 5 & up

The Edgerton Explorit Center presents the Wonderful World of Waves, which will dive into the many sound waves we experience every day without really thinking about it. With kids helping, we will explore what different types of sounds can sound like and how they reach our ears. **WAVE IN A BOTTLE:** This is a fun twist to the density tube lab. Using a larger bottle and the traditional oil, water, and color tab, kids will make waves, discuss their observations and discoveries, and have fun! Kids will be able to take their lab home with them!
