- 7:30-8:30 pm Open Discussion and Stations

Talk with technical
experts and hear

presentations by

John Callen, PE, CFM,

**Brooke Seachord, and
Kayla Vondracek.**

Please attend our open house to give input on projects that will reduce flood risk in your community.

Much of Verdigre's existing drainage system was damaged during the 2019 flood event and needs to be repaired or replaced. Additionally, Verdigre Creek flooding impacted much of the community. JEO Consulting Group recently evaluated the Village's drainage infrastructure as well as Verdigre Creek flood risk. JEO has developed recommendations to reduce the risk of future flooding damages due to Verdigre's drainage system as well as Verdigre Creek flooding.

Your input will be important in choosing potential solutions for Verdigre's flood risk reduction actions!

Refreshments
will be provided!
